MPW Industrial Air Utility Services provides highly energy-efficient Ingersoll Rand centrifugal, oil-free compressors tailored to meet customers' Compressed Air Solution (CAS) needs. These plug-and-play modules can be air-cooled or feature self-contained, integrated cooling systems, making them easily transportable and continuously maintained by MPW.

The CAS Modules offer 10-15% energy savings compared to older systems with MPW managing all service, repair and monitoring, ensuring reduced downtime and lower operational costs. Additionally, MPW provides complete, uninterrupted backup services to prevent costly downtime.

No significant upfront capital is required to acquire MPW's Compressed Air Solution equipment and maintenance services. We offer high-quality, reliable solutions at a fraction of typical costs.

MPW also offers flexible rental options for Centrifugal Module units, ideal for both short and long-term needs. For more details on electrical supply, water requirements, pressures, and setup, please contact us.

FEATURES

- Leak detection & system analysis
- MPW designs, engineers and manufactures complete modular air systems in-house at our corporate fabrication facility
- Designed for industry-best energy efficiency
- 24/7 remote monitoring and access
- Data acquisition system to ensure air quality parameters are always met
- 100% reliable, instrument air quality
- N+1 or N+2 compressor redundancy at each plant site
- 24-hour operational and engineering support
- Controlled environment within modular facility
- Option for top quality air (Class 0 per ISO 8573-1:2010) to protect sensitive downstream equipment for reliability and long life

BENEFITS

- Guaranteed performance
- MPW provides and maintains most recent technology
- 10% - 30% energy cost savings
- Eliminates maintenance, repair and rental costs
- MPW manages the entire air operation and any associated risks
- Eliminates capital investment
- Experienced compressed air experts provide technical knowledge

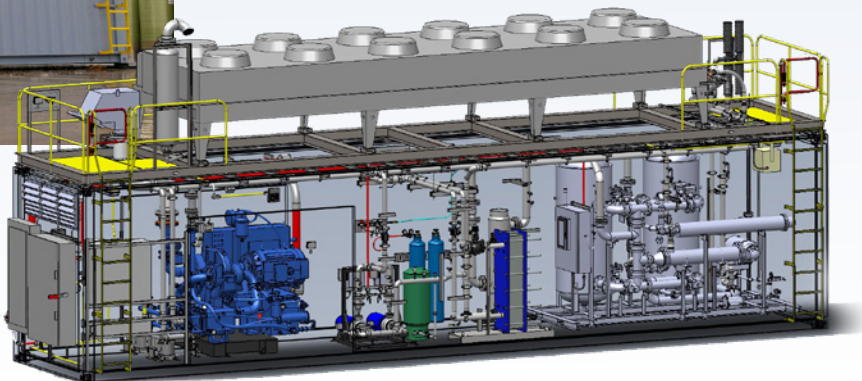

INDUSTRIES

- Automotive
- Chemical
- Clean Rooms (Medical & Electronic)
- Food & Beverage
- Manufacturing
- Mining
- Petrochemical/Refining
- Pulp & Paper
- Power Generation
- Steel

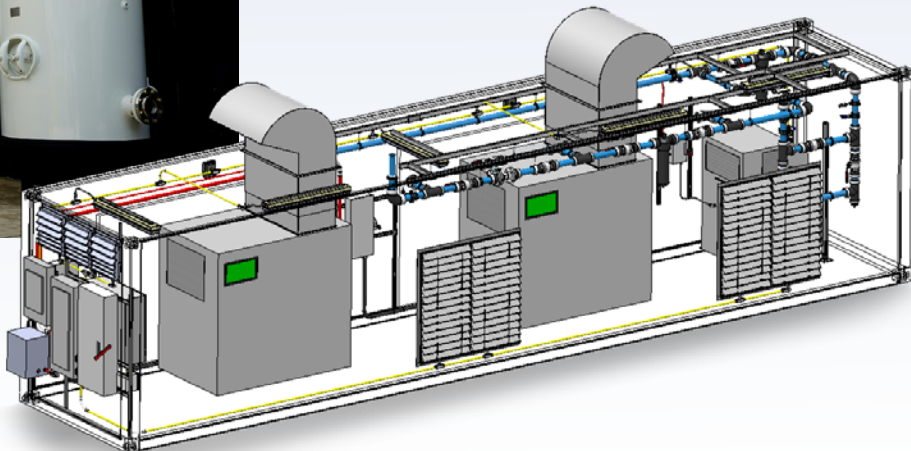

MPW builds custom designed and engineered modular facilities to provide customers with the most advanced, energy efficient compressed air systems.

CENTRIFUGAL COMPRESSED AIR MODULE

ROTARY SCREW COMPRESSED AIR MODULE

Contact MPW to provide you with details on a high reliability, no maintenance, energy efficient compressed air utility that assures 24/7 monitoring and uptime, with no capital outlay required.
